

A man and a woman are shown from the chest up, looking towards the right. The woman on the left has long brown hair and is wearing a white top and brown sunglasses. The man on the right has short dark hair and a beard, wearing a brown t-shirt and brown glasses. The background is a clear blue sky. The brand name 'CICLO' is overlaid in the center in a white, stylized font where the 'O's are circular arrows.

WELCOME TO THE FUTURE OF PHARMACY EYEWEAR

# HELLO

If you have started reading this catalogue, it is because you want to know another way of looking at the world of Pharmacy glasses.

We are **CICLO**, the new Spanish brand of reading glasses, screens and sunglasses, made from recycled materials and sold exclusively in Pharmacies.

**CICLO** was born in 2022 as a result of 5 years of experience of our brand **PARAFINA** in pharmacies and maintains its ecological and social essence.

## OUR MISION

To offer everyone the possibility to create a positive impact on the environment and society by wearing quality, designer, eco-friendly eyewear in their daily lives.

# OUR VALUE PROPOSAL

## 100% Recycled Frames

All our frames are made from 100% recycled materials: **recycled plastic bottles (PET) and recycled rubber tyres.**

## Exclusive Sales in Pharmacies.

**Our glasses are sold exclusively in Pharmacies.**

Both our product and our brand are 100% focused on sales in Pharmacies.

## Social Project

**We donate 5% of our net sales to the Ciclo Social Project.**

Through this project we help students with good grades and few resources to access university.

Intertek

**Certified Environmentally Responsible Product..**

Certified

Corporation

**This company meets the highest standards of social and environmental impact**

PET PLASTIC AND RUBBER HAVE PROPERTIES SUCH AS STRENGTH AND LIGHTNESS, AND CAN BE RECYCLED AND TRANSFORMED INTO GLASSES THAT INHERIT THESE PROPERTIES.

## Recycled PET Plastic

Bottles of water, soft drinks, etc

It is a resistant, light and malleable material.

All these characteristics are maintained when it is recycled, which is the best solution to the environmental pollution caused by this material. We get comfortable, light and environmentally friendly glasses.

## Recycled Rubber

**Recycled Tires.**

Tyres are made from natural rubber, plastic, metal and other components.

By recycling them and using them for our Triana and Malasaña eyewear models, we give them the ideal characteristics to fulfil their function: flexibility, resistance and lightness.

# SOCIAL PROJECT OF UNIVERSITY SCHOLARSHIP

OUR WORK AS A BRAND GOES BEYOND ENVIRONMENTAL SUSTAINABILITY AND ALSO SEEKS **TO HAVE A POSITIVE IMPACT ON SOCIETY.**

That is why we founded the **Ciclo Social Project**, a university scholarship project of academic excellence through which we help girls and boys with good grades and few resources, from a small neighbourhood in Asunción (Paraguay), to access university.

**We donate 5% of our annual net sales to this project**, which initially had 13 scholarship recipients who, thanks to their hard work and effort, have received their Ciclo scholarship and are going to make their dream of a university degree come true.

A close-up photograph of a woman with long, dark, wavy hair. She is wearing purple-framed sunglasses with dark lenses. Her hair is slightly damp and blowing in the wind. She is positioned in front of a swimming pool with clear blue water. The background shows a portion of a pool deck and some greenery.
